FOR IMMEDIATE RELEASE

METECNO-API, AN AIA/CES REGISTERED PROVIDER RELEASES THIRD IN A SERIES OF FOUR ACCREDITED PROGRAMS, "FACTORY INSULATED FOAM PANELS, PART II COMMERCIAL/INDUSTRIAL FOAM PANEL DESIGN".

Architects and designers will now become familiar with the design and application of Commercial and Industrial Foam Panels while earning AIA/CES credits! This hour long program delivers HSW credit along with the other three AIA accredited programs now released by Metecno-API out of Modesto, CA.

Attendees of this seminar will learn of additional design and structural considerations for Commercial/Industrial Foam Panels. They will be updated on product approvals and testing completed on Commercial/Industrial Foam Panels. They will learn of exterior finishes and paint systems available for Commercial/Industrial Foam Panel design as well as the core materials used in the manufacturing processes. Other seminar topics include synthetic stucco, retrofit, interior facings and designing for sunscreens, architectural accents and window systems.

Registered architects earn one Learning Unit for attending the seminar and non-AIA members receive a Metecno-API Certificate of Completion for their State MCE License requirements.

Visit www.apipanel.com or call 800-377-5110 for more information on reserving AIA/CES Provider Number J508, Registered Program Number FIFPII, "Factory Insulated Foam Panels, Part II Commercial/Industrial Foam Panel Design", as presented by Metecno-API.

You are also welcomed to inquire as to the remaining three accredited seminars in this series:

FIFPI – Factory Insulated Foam Panels, Part I, A Complete Introduction

FIFPIII – Factory Insulated Foam Panels, Part III, Architectural Foam Panel Design

FIFPIV – Factory Insulated Foam Panels, Part IV, Cold Storage Construction
