Modesto, CA -

FOR IMMEDIATE RELEASE!

**METECNO-API PRODUCES NORTH AMERICA'S ONLY
SINE WAVE PROFILE FOAM CORE INSULATED PANEL**

Announced this fall at Metalcon International 2004 in Las Vegas, Metecno-API released its newest, most ingenious panel to date, Centurywall™ **H-Wave**.

The **H-Wave**, North America's only sine wave profile foam core insulated panel, provides a continuous sweeping profile while creating beautiful shadowing effects. Metecno-API is offering the **H-Wave** as a 2 or 3-inch thick panel, with a concealed fastener type attachment and an interlocking tongue and groove joint configuration. The one-meter (39 3/8") module is designed for fast, efficient installation, and can be installed horizontally or vertically. The 2-inch thick system delivers an R-Value of 15, while the 3-inch thick system delivers an R-Value of 23. The **H-Wave** easily integrates with Metecno-API's standard flat Centurywall™ panels as an architectural accent.

For more information on the H-Wave, call 800-377-5110 or ride the wave at www.apipanel.com
